

half circle trellis, double row of columns, lattice roof
CAL

Calmeria

Design Intent:

The Calmeria is a contemporary trellis form drawn from the traditional theme a circular column array to denote a place of importance or celebration. The circular columns support latilla members that are pitched to provide drama and energy.

Standard With This Structure:

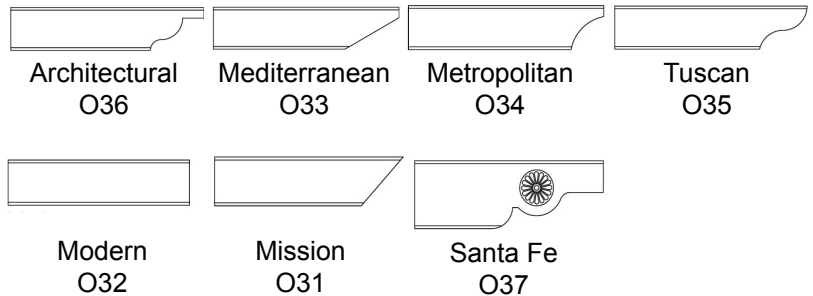

- Steel columns and frame members coated with super-durable Poli-5000 powder coat finish.
- Steel lattice roof.

Shelter Options:

Shelter can be modified by adding railing, integrated seating, lightning protection, electrical cutouts, an increase in clearance height, a different column design or by specifying latilla and/or truss end designs. Rough sawn cedar is available as an option for the lattice roof.

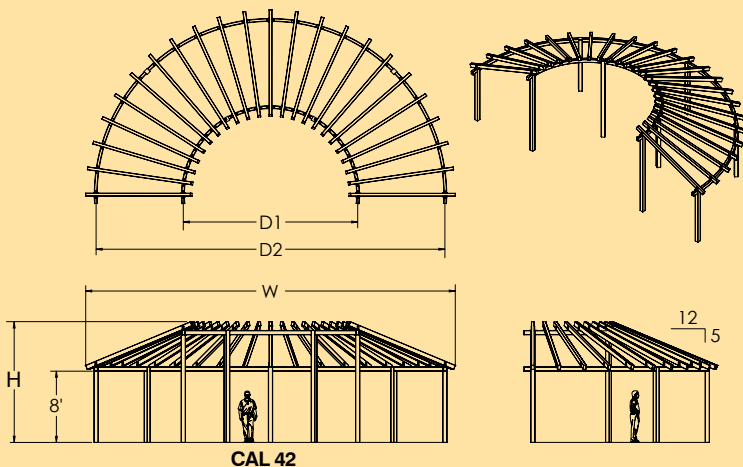

End of Beam Options
