

Lantern Series

'Lantern' – An open or windowed structure on the roof of a building or the upper part of a tower of the like, to admit air and light - Webster Dictionary

The Lantern Shelter is a distinct new product from Polygon, a shelter that combines a hexagon structure with a unique faceted translucent cupola. The cupola has an open base so it is ventilating, or the base can be closed to prevent airflow.

Super tough multi-wall polycarbonate panels provide glare free lighting to the interior of the shelter during the daylight hours and, with shelter interior lighting, provide a soft glow during night time hours.

Cupola Features

- Available opacity:
 - Clear - 80% light transmission
 - Bronze - 35% light transmission
 - Opal White - 35% light transmission
- Venting
- Weather and UV resistance
- Blocks virtually all UV radiation
- Excellent structural durability
- Lightweight and impact resistant
