

Design Intent

Ancient Greece is well known for its use of decorative stone columns, not only for enclosed structures but also for elegant exterior colonnades. This is the inspiration for the Greco trellis, a circular format of columns capped with a curved beam and arrayed with latilla.

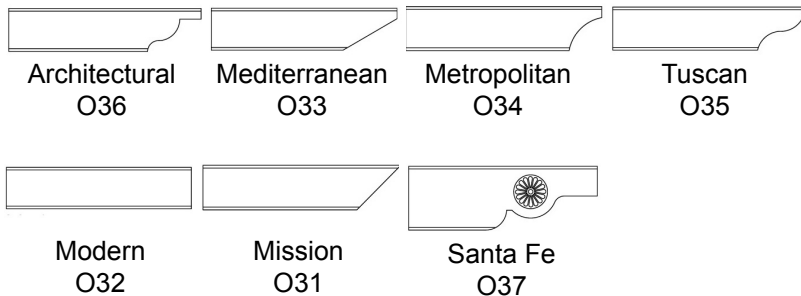

Standard With This Structure:

- Steel columns and frame members coated with super-durable Poli-5000 powder coat finish.
- Steel or rough sawn cedar lattice roof.

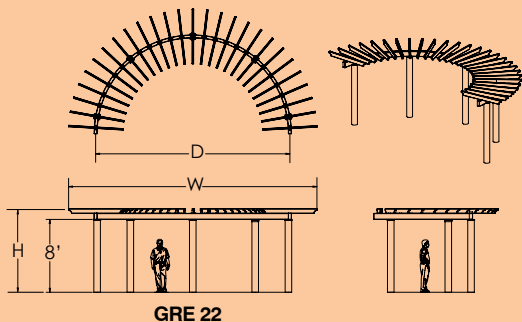

Shelter Modifications:

Modifications include specifying Latilla ends and truss ends, adding railing, integrated seating, lightning protection, electrical cutouts, increasing clearance height and/or custom columns.

End of Beam Options

See www.poligon.com for larger images.

Standard Sizes

BIN	W	D	Arc	# of columns	Height*
GRE	22	16	180	4	9'- 1"
GRE	26	20	180	5	9'- 1"
GRE	30	24	180	6	9'- 1"

Shelter **sizes** can be increased by 1' increments.

***Height** dimension is approximate and for reference only.
